## Still Picture Presentations

Still Photographs or slides to DVD

**5.00 per Digital photo**  
in original camera resolution  
\$50.00 minimum

Hard Copy Documents or Photos  
**\$7.00** per document or photo

Includes: Scanning prints and photographs of any size into the computer and then transferring the pictures to video or DVD .

Creation  
of a

Powerpoint Presentation  
from your photos.

**\$10.00 per powerpoint slide**

Includes: Scanning your photos into the computer then sizing them to fit the standard Powerpoint screen resolution of 1024x768 pixel resolution. Every effort will be made to include as much of the picture as possible. If you are providing the electronic file, please give them to us in high quality JPEG format at the highest resolution possible! Web quality is NOT good enough.

## Other Services

ESV Teleproductions has many years experience in the multimedia business. If you require something that is not on this pamphlet, please don't hesitate to ask. There is no doubt we will be able to accommodate you.

## Motion Picture Film to Video Transfer

Digital transfer of film to tape or DVD

First one-half hour (1/2) hour of  
completed running time

**\$75.00**

Each additional one-half (1/2) hour  
of completed running time

**\$40.00**

### Motion Picture Film Footage to Video time Conversion

Film Length	Video Running time
1080 ft. 16mm	1/2 hour
450 ft. 8mm	
450 ft. S-8mm	

Nine of the 3" regular or Super 8mm are equal to  
one half hour of running time

Film Transfers include:

All necessary splicing of the film (using commercial hot splices) and cleaning with motion picture cleaner and lubricant. We will remove any unusable film; without a recognizable image and repair or remove sprocket damaged film. However, curled or brittle film may not run through the system and is subject to breakage. All film is mounted on 400ft. reels before transferring to tape or DVD. The price of the reels is not included in the transfer service price.

Due to different scan rates of film and N.T.S.C. television, film projected for TV is at a slightly higher rate than normal. Also the frame area of TV and film differ slightly, so that there is a slight loss of picture area from the original. Scene by scene editing of the film for those who wish is available. This service is priced at the standard rate for video editing.

While every effort is made to insure the highest quality, we cannot guarantee color matching, or correction for under or over-exposed film. Damaged film or tape may require special handling at additional cost to the customer and results cannot be guaranteed. ESV assumes no liability for damaged media or the images or data thereon. Original tapes or films will be returned to the customer whenever possible. Reels from which film has been removed from prior to transfer will be returned; if requested by the customer at the time of this order. It is the responsibility of the customer to secure all copyright releases of material provided to ESV for duplication. ESV shall be indemnified by the customer for any infringement.

## Video Duplication

Video Duplication

**\$25.00** per dub  
up to two hours on DVD-R or VHS  
per tape or disk.

This is a direct copy only, for any editing,
